## EXPERIENCE

### CURRENT POSITION

Apprentice Developer

**Tesisquare, September 2022 - Present**

**Frontend Development:** Responsible for the development of efficient and intuitive user interface components.

**Backend Development (POST and REST APIs):** Manage the design and implementation of the backend, focusing on both POST and REST APIs to ensure a robust and high-performance architecture.

**Client Requirement Analysis:** Conduct in-depth analysis of client requirements to understand needs and ensure proper implementation in the development process.

**Development in Response to Client Requirements:** Utilize information acquired during requirement analysis to guide the development process, ensuring the final product meets client expectations.

**Code Control with GitLab:** Manage code control using GitLab, ensuring repositories are organized, and code is regularly reviewed for quality and consistency.

Development Intern

**Mistral Impianti, Summer 2021**

**Website Development:** Actively contributed to the development of the company's website, implementing new features and ensuring optimal user experience.

**File and Resource Organization:** Efficiently organized files and resources through the implementation of a management system, improving structure and facilitating internal management.

*While part of a short-term internship, these responsibilities significantly contributed to the development of the company's website and the optimization of internal resources.*

## LANGUAGES

**Italian:** Native proficiency

**English:** Proficient (B2 level  
- First Certificate in English)

## EDUCATION

### *ITIS G. Vallauri di Fossano*

Diploma in Computer Science and Telecommunications, 2022

### *Pegaso University*

Currently pursuing a Bachelor's degree in Computer Science for Digital Companies (L-31 in Computer Science), expected graduation in late 2024/early 2025

## SKILLS AND INTERESTS

Technical Skills:

- **Programming Languages:** ColdFusion, JavaScript, TypeScript, Python.
- **Frontend Frameworks:** Angular, Next.js.
- **Code Refactoring:** Experience in improving and optimizing existing code for increased quality and maintainability.
- **Code Management:** Git (GitHub, GitLab), use of desktop applications such as Sourcetree and Fork.
- **Web Development:** Development and refactoring of websites, with experience in design and implementation.
- **Server Management:** Advanced skills in server management with IIS.
- **Web Services and APIs:** Creation and management of web services with REST and POST APIs, use of tools like Postman.

Additional Skills:

- **Collaboration:** Proven ability to work in teams and collaborate effectively with other developers.
- **Problem Solving:** Skills in solving complex problems and finding efficient solutions.
- **Continuous Learning:** Constant commitment to deepening and learning new technologies and methodologies.

## PROJECTS

### *Smeon Website (Next.js)*

**smeon.it** (actually available only in italian)

**Description:** Developed and implemented the corporate website "smeon" using Next.js, a React framework. Designed and optimized the user interface for enhanced user experience.

#### **Responsibilities:**

- **Frontend Development:** Created efficient and responsive user interface components.
- **Performance Optimization:** Employed best practices to ensure optimal website performance.
- **Integration of Features:** Implemented new functionalities to enhance the overall user experience.
- **Version Control:** Utilized Git for effective code versioning and collaboration.
